Projected occupancy grouped by declared biological context

Similarity is structural evidence; Ensembl classes, predicted TFBS and CUT&RUN enrichment do not prove reporter activity or sufficiency.

Reporter interpretation boundaries

Transcript annotation alone does not indicate which TSS is used in the assayed cells.
CUT&RUN overlap is occupancy/enrichment evidence, not proof of TSS usage, promoter activity, direct regulation, biochemical affinity, or luciferase output.
Reporter geometry does not verify the identity of a physical laboratory construct.
