

TGFβ1 promoter-reporter architectures

5' -> 3' display, genomic 41358961 -> 41287203 | strand - | assembly GRCh38 | annotation Ensembl 116 prepared GRCh38; selected reporter transcripts | upstream 5000 bp | downstream 1000 bp

Canonical reporter comparison: 1 TSS classes(), 3 transcript(s), 9 explicit architecture row(s); normalized evidence remains observational/predictive context.

11 additional source-bound row(s) omitted from SIG; complete rows remain in 350M.

10 exact-geometry ePWR row(s) combined with matching displayed features; complete rows remain in 350M.

Similarity is structural evidence; Ensembl classes, predicted TFBS and CUT&RUN enrichment do not prove reporter activity or sufficiency.

Reporter interpretation boundaries

Transcript annotation alone does not establish which TSS is used in the assayed cells.

CUT&RUN overlap is occupancy/enrichment evidence, not proof of TSS usage, promoter activity, direct regulation, biochemical affinity, or luciferase output.

Reporter geometry does not verify the identity of a physical laboratory construct.

Warnings / interpretation checks
