

TP73 promoter-reporter architectures

5' -> 3' display, genomic 3647516 -> 3737201 | strand + | assembly GRCh38 | annotation Ensembl 116 prepared GRCh38; selected reporter transcripts | upstream 5000 bp | downstream 1000 bp

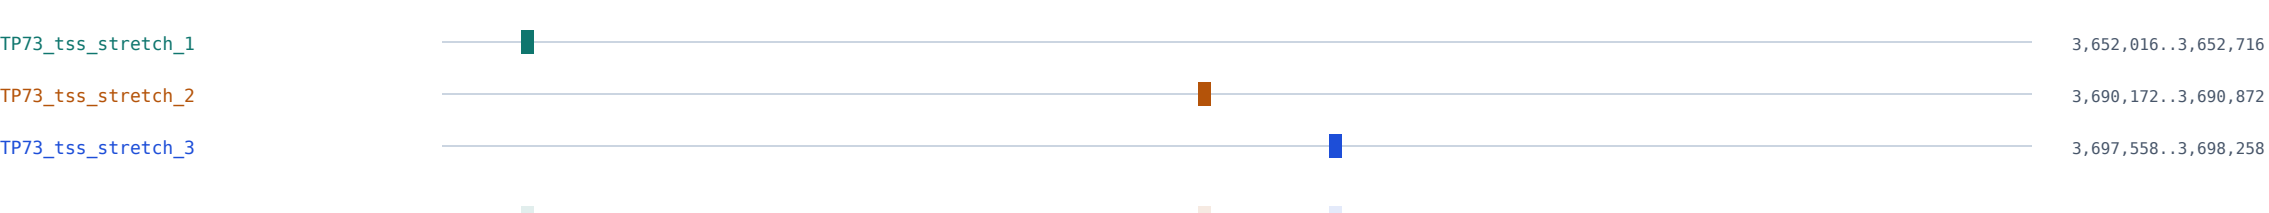

Canonical reporter comparison: 3 TSS class(es), 3 transcript(s), 9 explicit architecture row(s); normalized evidence remains observational/predictive context.

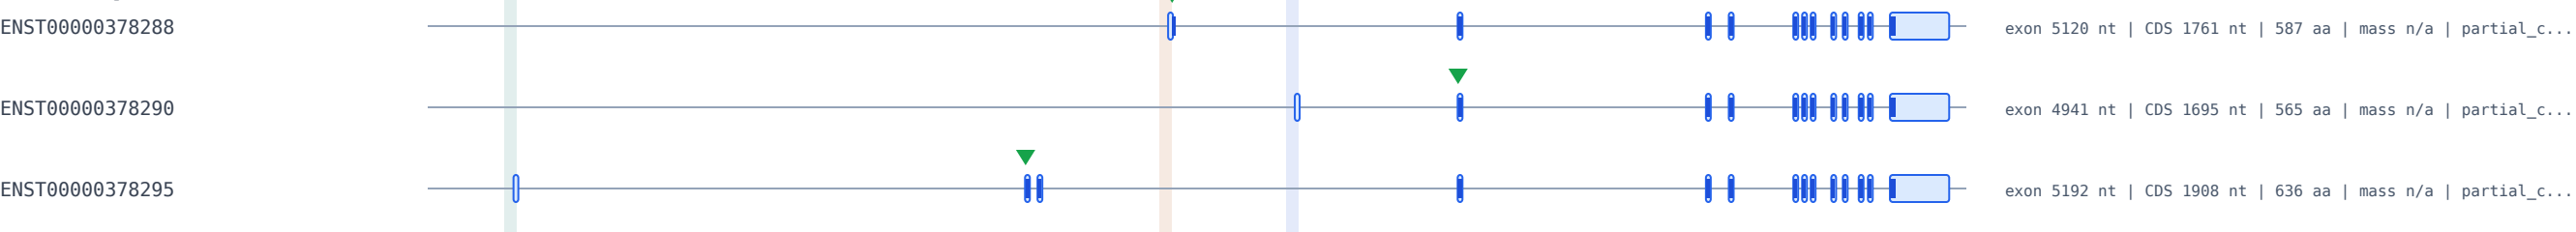

Legend (annotation-derived transcript features)

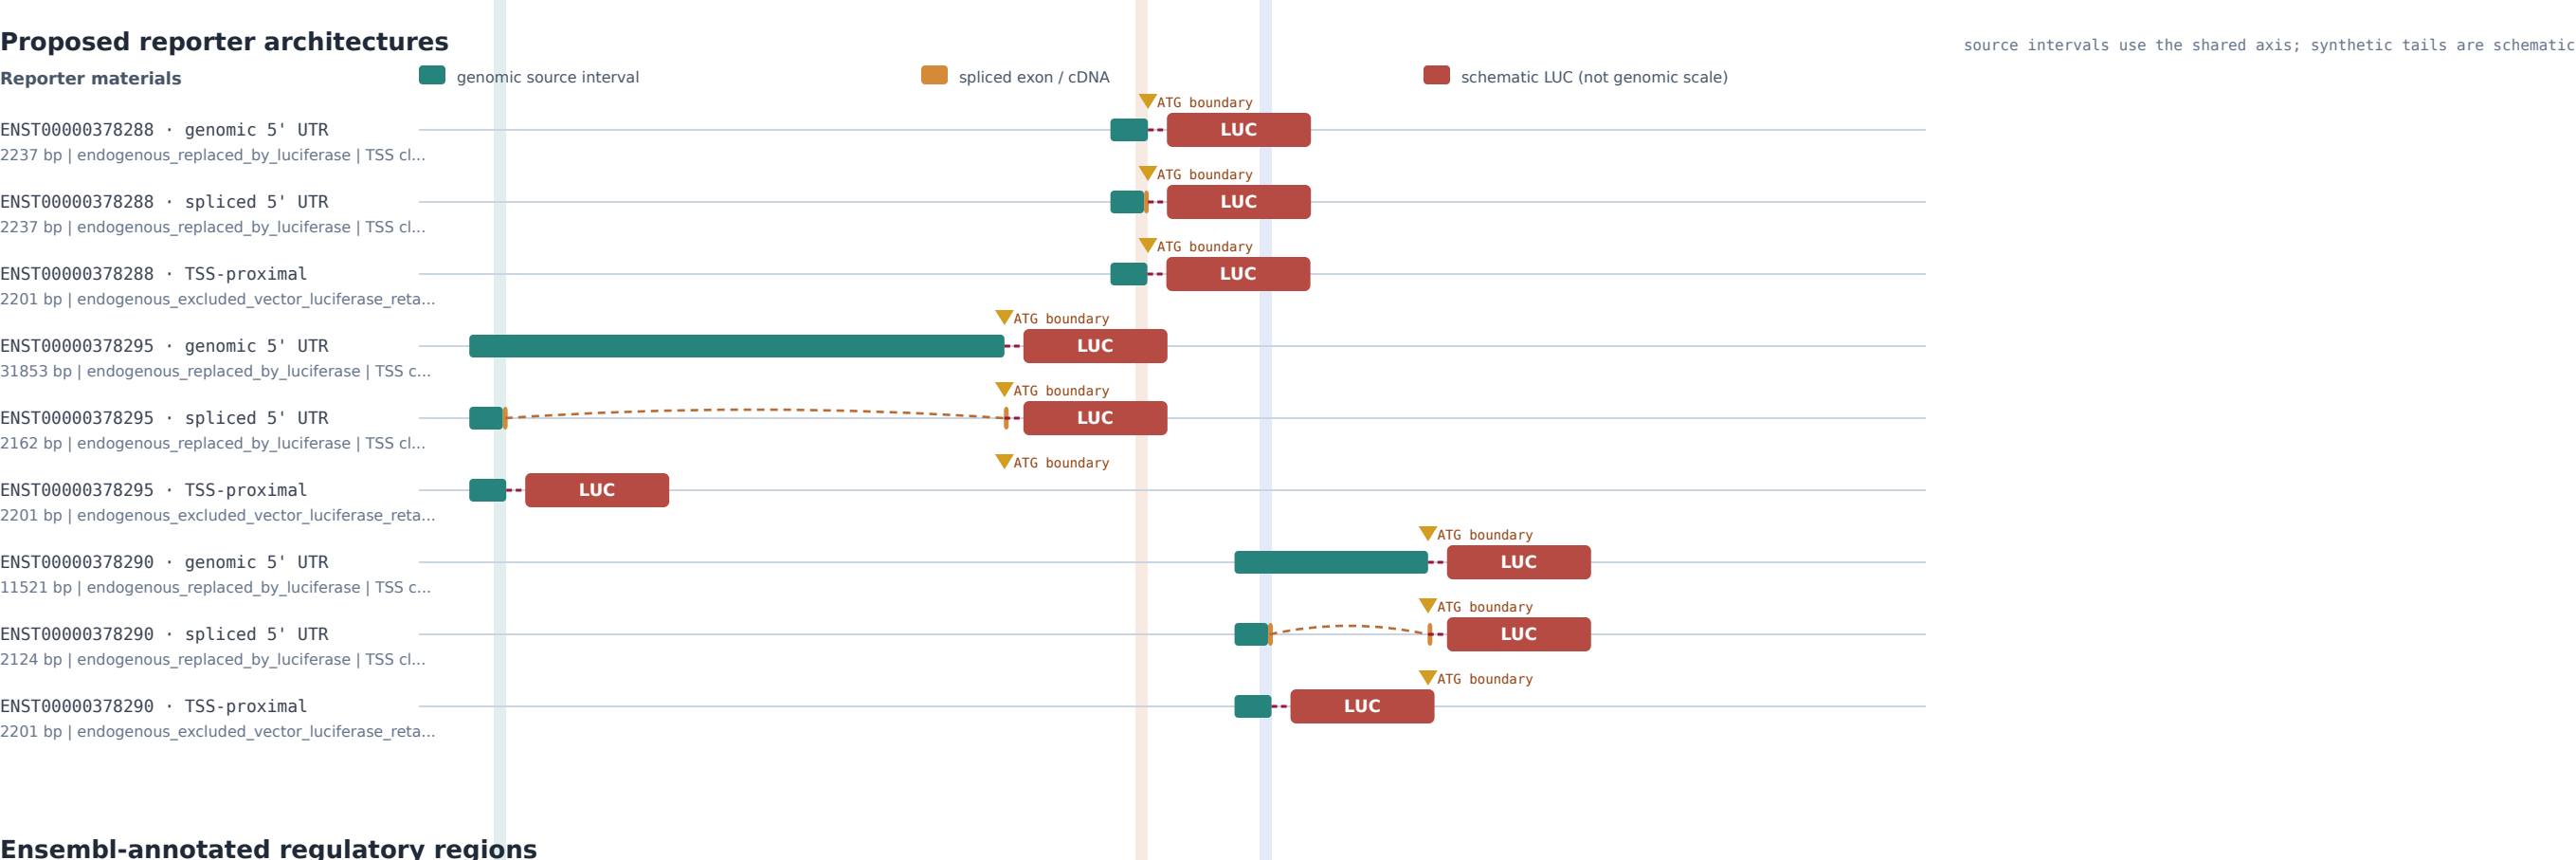

TSS stretches: reference for similarity below

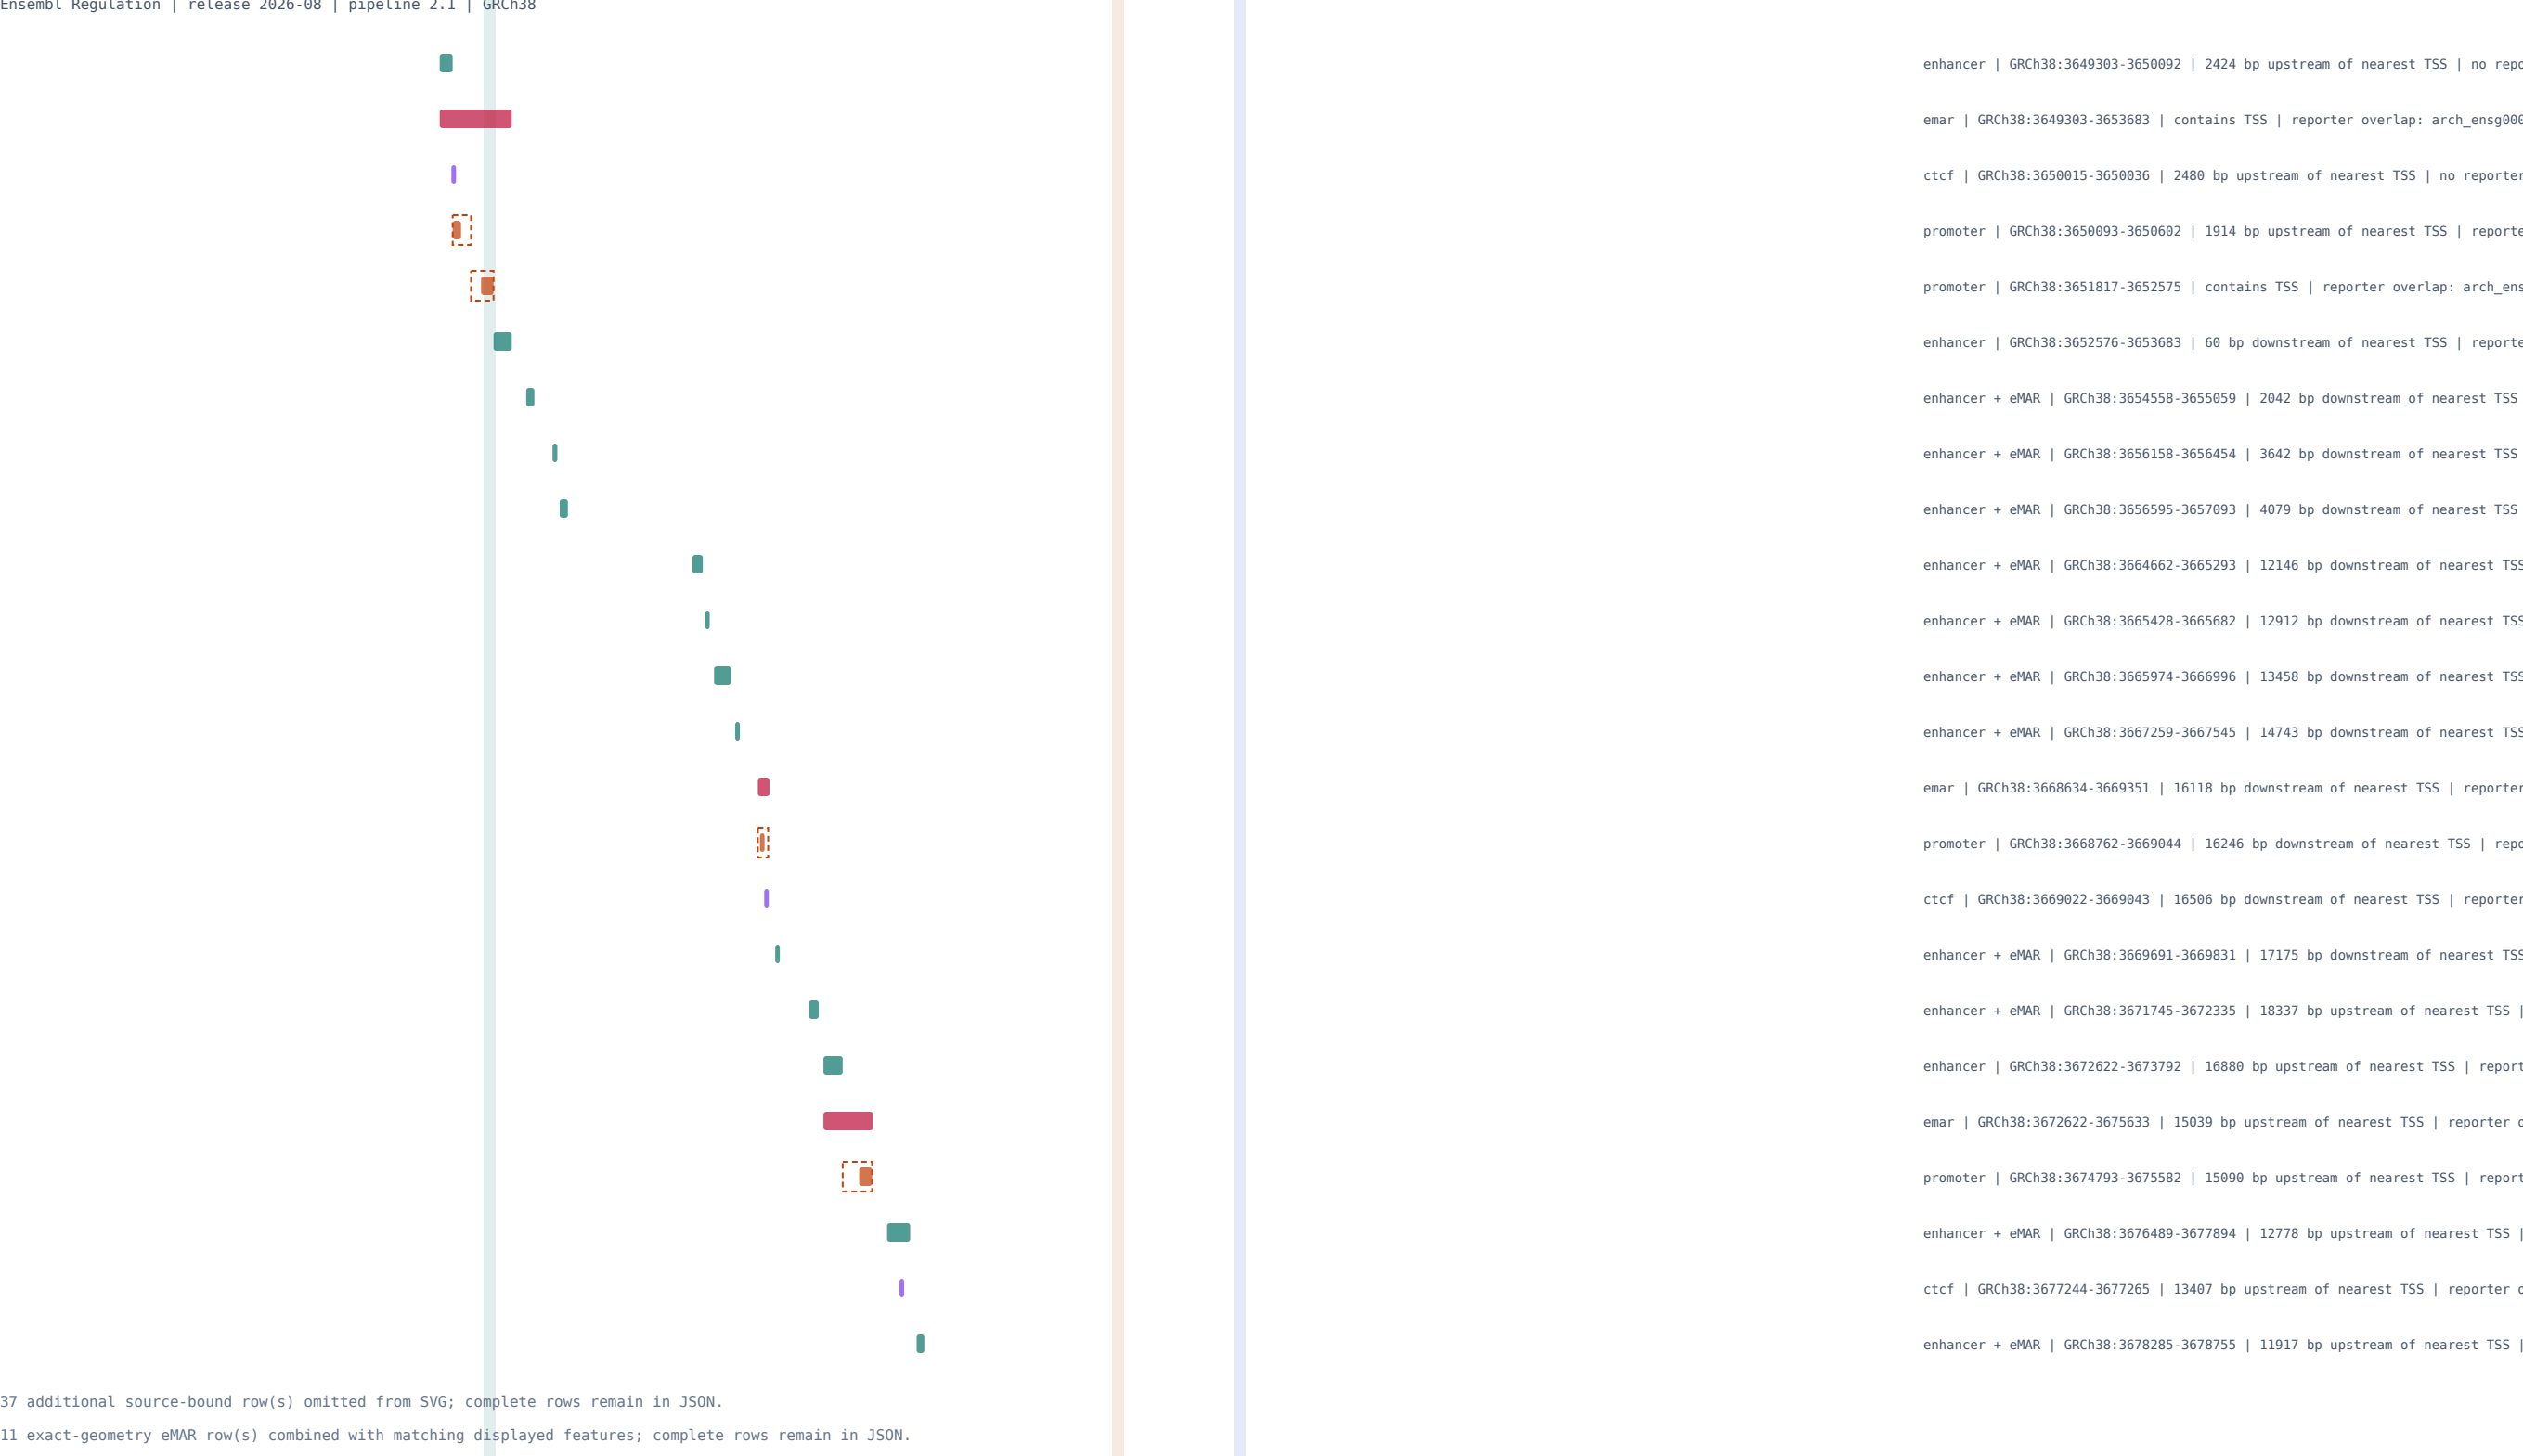

Transcript models and annotation-derived metrics

Proposed reporter architectures

Ensembl-annotated regulatory regions

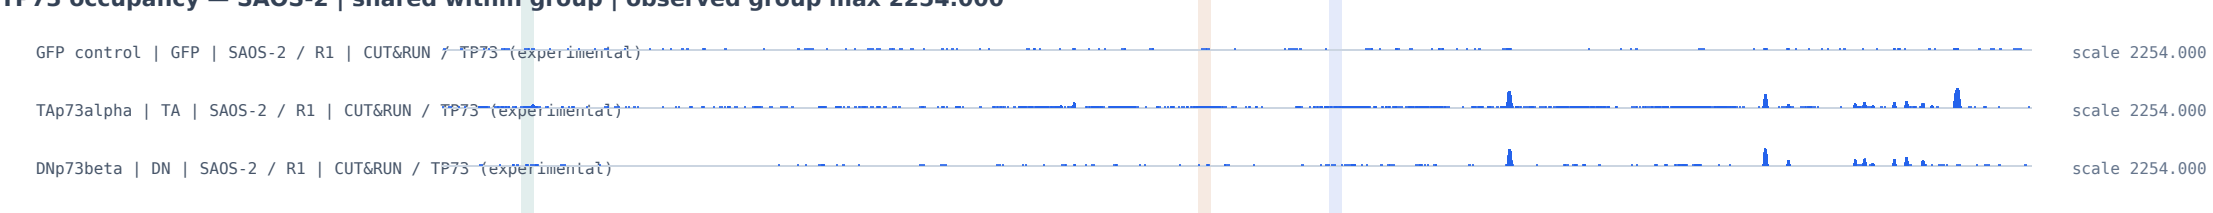

37 additional source-bound row(s) omitted from SVG; complete rows remain in JSOM.

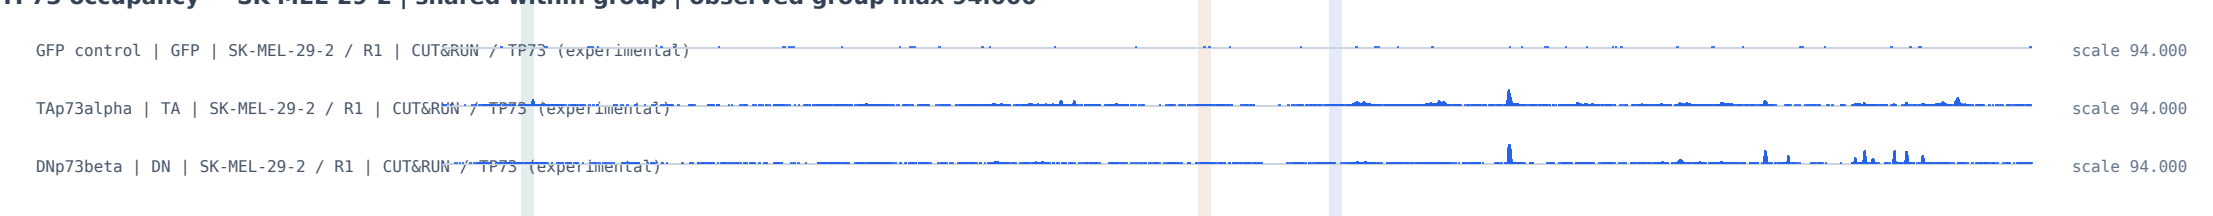

11 exact-geometry ePAR row(s) combined with matching displayed features; complete rows remain in JSOM.

Projected occupancy grouped by declared biological context

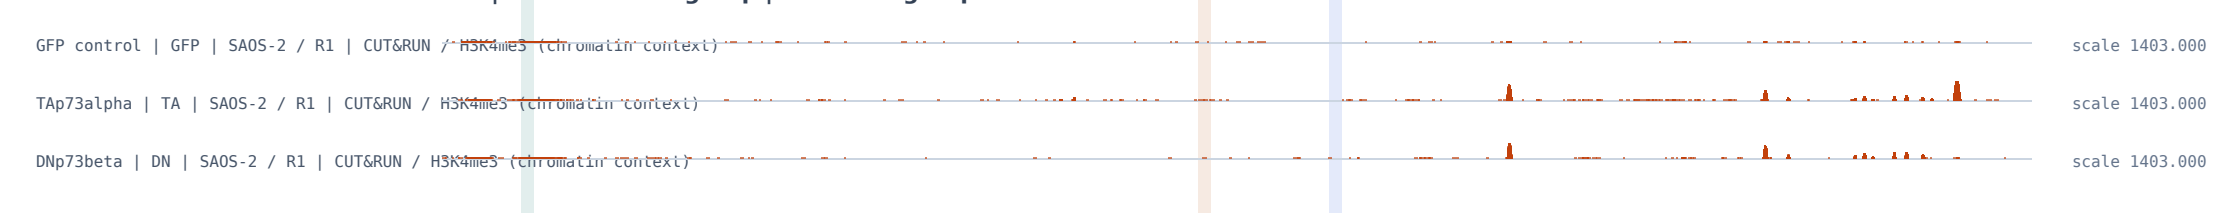

TP73 occupancy — SA05-2 | shared within group | observed group max 2254.000

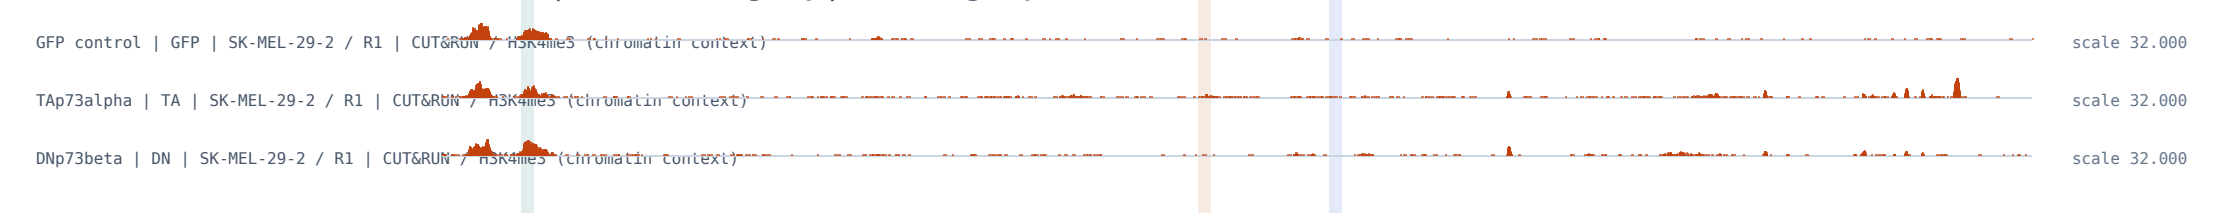

TP73 occupancy — SK-MEL-29-2 | shared within group | observed group max 94.000

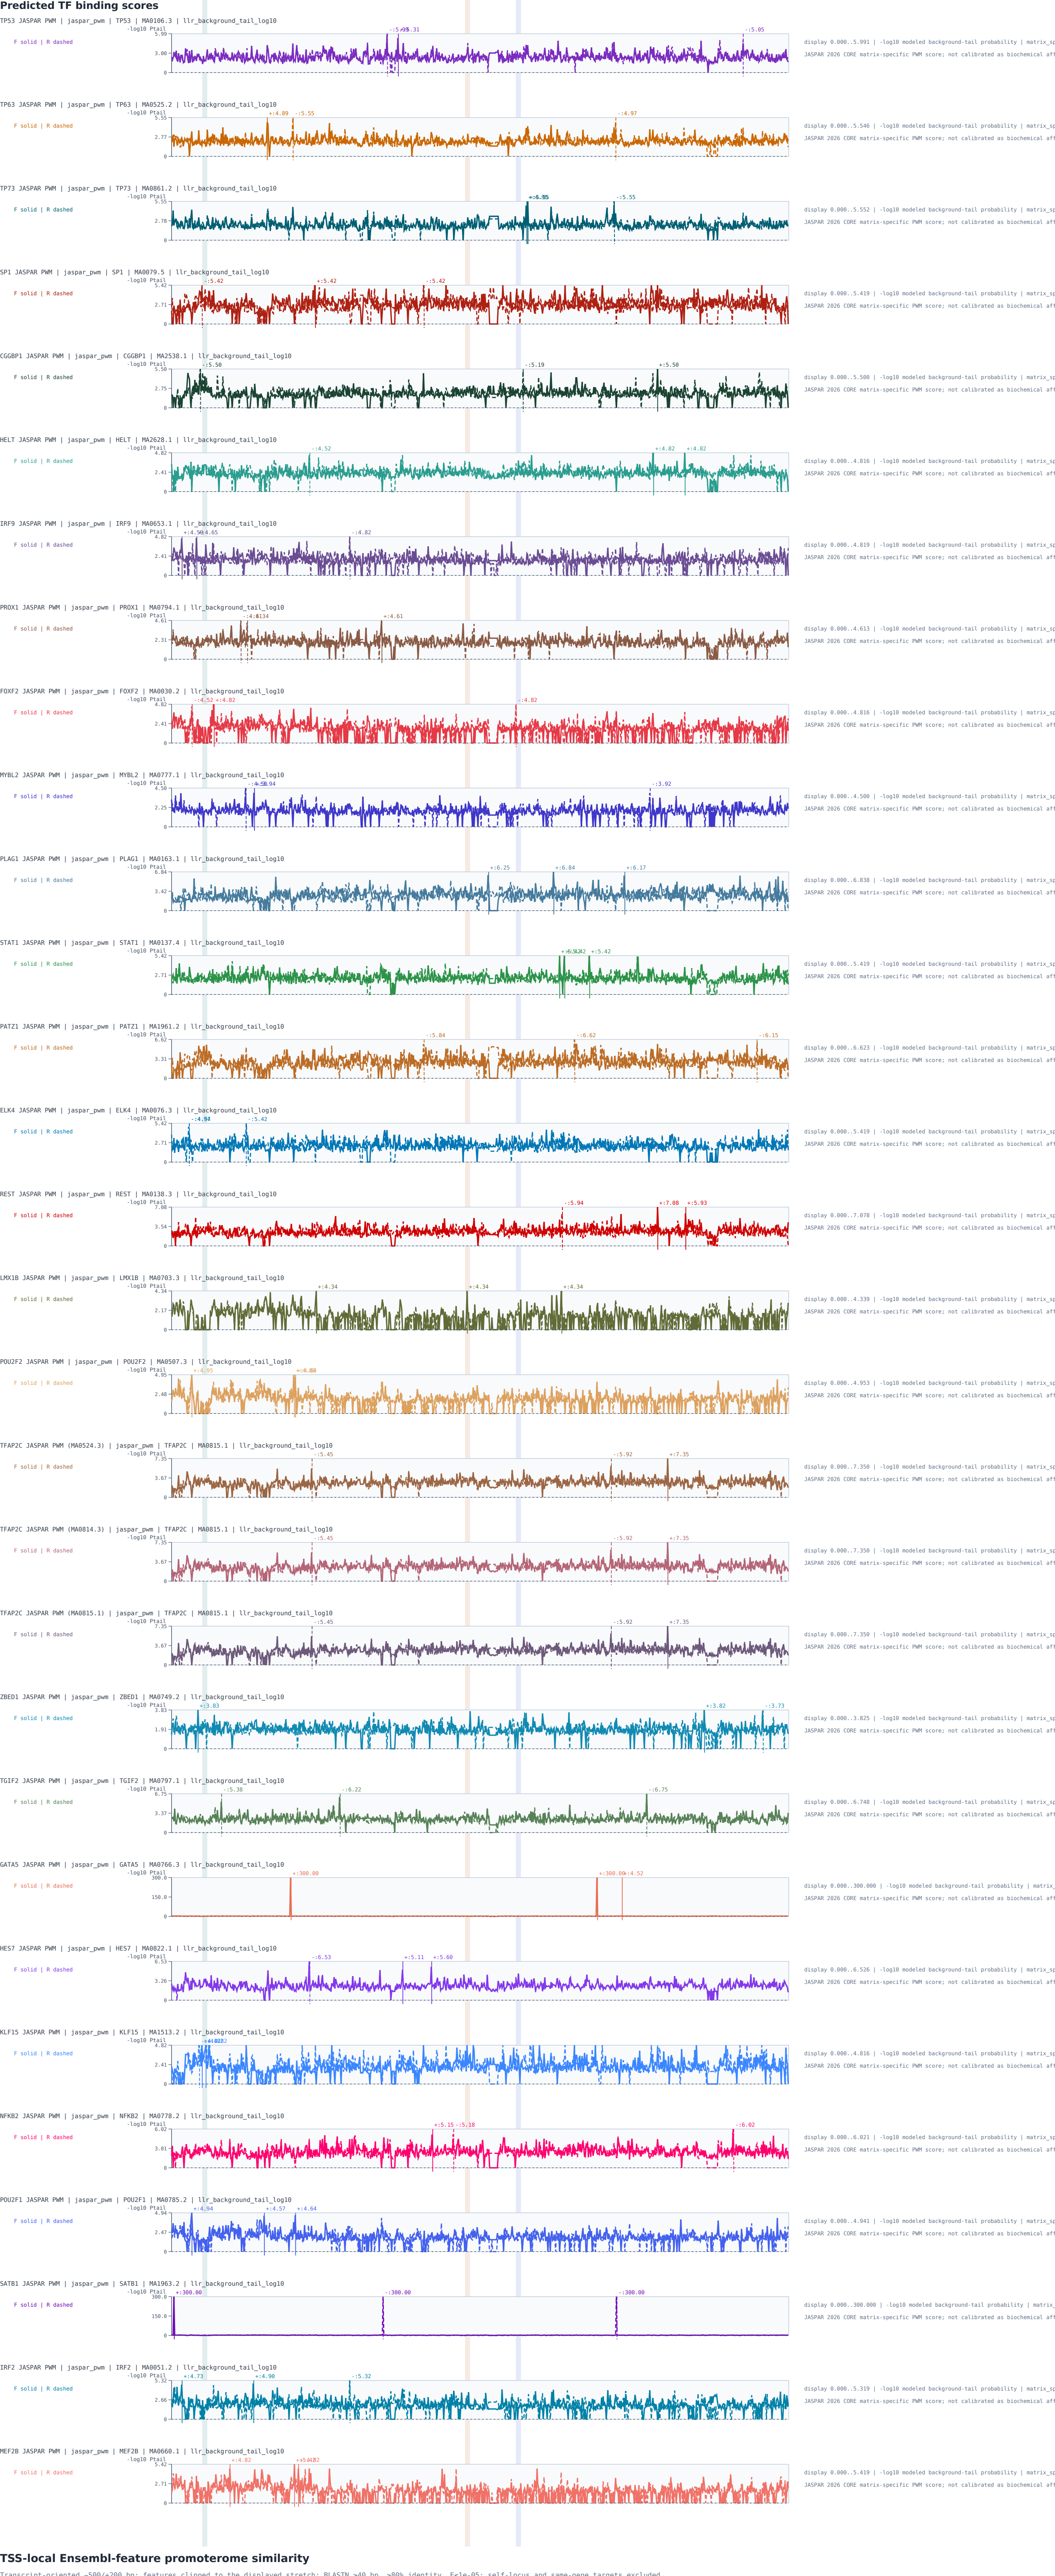

H3K4me3 chromatin context — SA05-2 | shared within group | observed group max 1403.000

H3K4me3 chromatin context — SK-MEL-29-2 | shared within group | observed group max 32.000

Predicted TF binding scores

TSS-local Ensembl-feature promoterome similarity

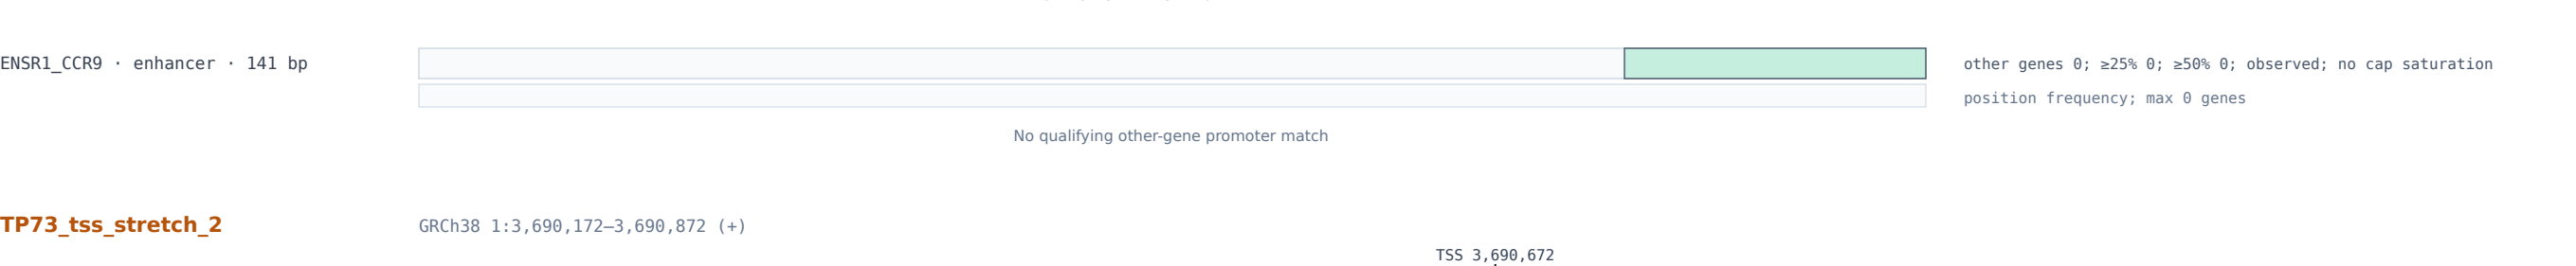

Transcript-oriented ~500/200 bp; features clipped to the displayed stretch; BLASTN >40 bp, >80% identity, Esle-05; self-locus and same-gene targets excluded.

Blue frequency strips count distinct other genes by query position. Numbered blocks give target-promoter order; red outlines mark order/orientation breaks.

TP73_tss_stretch_1

TP73_tss_stretch_2

TP73_tss_stretch_3

Similarity is structural evidence; Ensembl classes, predicted TFBS and CUT&RUN enrichment do not prove reporter activity or sufficiency.

Reporter interpretation boundaries

Transcript annotation alone does not establish which TSS is used in the assayed cells.

CUT&RUN overlap is occupancy/enrichment evidence, not proof of TSS usage, promoter activity, direct regulation, biochemical affinity, or luciferase output.

Reporter geometry does not verify the identity of a physical laboratory construct.

Warnings / interpretation checks
